

Cadline Engineering Services – Project Partnership Event – Agenda:

TIME	CONTENT
09:00	Welcome & Introductions
09:30	CAPTURE – Ciara McCauley, 3D Surveyor See how our 'in house' team of surveyors capture your existing site conditions using 3D laser scanners. Learn how we optimise and process the data, how we quickly share this data and how it can instantly benefit your end clients. Understand how we can improve Health & Safety by reducing man hours on site.
10:15	PROCESS – Wes Partington, Senior BIM Consultant See how we convert point cloud data so it's ready for detailed design. We will show you the tools, tips and methods that our team use on clients live project work. Our design team will demonstrate how we create usable and accurate BIM models in less time than ever before.
11:00	Coffee & Networking
11:15	OPERATE – Adrian Edmunds, Asset and Reality Capture Specialist See how we now take BIM data past the handover stage into the world of FM. We will show our new 'Focal Lite' solution - the stepping stone from BIM to FM. See how we are enabling owner operators to easily make use of their BIM lifecycle data and link it to real world Operation, Maintenance & Facilities Management.
12:00	Lunch & Close
